Dear Friends

It gives us immense pleasure to invite you to participate in 6th world congress of Chronomedicine WCC 2020, which is being organized this year from 24th to 26th Dec 2020 at Hotel Ramada Khajuraho MP India . This is first time we are organising conference in both offline and online mode.

As you are aware the incidence of various circadian disorders are growing fast in all the populations world over and India is also facing this problem because of changing work culture and living pattern. Most of these disorders are preventable and well manageable. We all are aware of the importance of time. We know that the earth revolves on its axis and it also makes a circle of sun, which has the basis for day and night as well as changing weather. Even our body has its own circadian clock and various peripheral cells have their own clocks. The whole circadian Rhythm is very complex and we are still searching the answers for many questions unanswered. Recently this Rhythm has been studied in relation to metabolic diseases and newer horizons are opening up in management of various chronic diseases. Human activities in modern world do not stop 24 hours. Insomnia is shown to induce glucose intolerance and dyslipidemia, chronic circadian rhythm disturbances and “eveningness” in life style which may lead to metabolic syndrome. It is important for all ages to have active daytime and restful night time in order to keep healthy life. As a fulfilment of these objectives WCC 2020 will cover wide range of topics on Circadian Rhythm to facilitate better understanding of the disease process.

Khajuraho, a historic city, which is haertland of hindu and Jain temples at Chatarpur district of MP, which is a UNESCO world heritage site. It offers an extraordinary ambience for deliberations on various topics related with chronomedicine. The weather at Khajuraho during september remains pleasant and surely it will provide a comfortable atmosphere for visitors coming from all parts of the world.
